

MINIMO
MINIMAL WINDOWS

AX-23B

AX-23B

The name "Classic" not only evokes the timeless appeal of the rectilinear window system, but also highlights its historical significance as the first-ever minimo system. The sliding windows comprise insulating glass units with perimeter aluminium sections, mounted in streamlined aluminium frames fitted flush with floor and ceiling, each unit rolls fluidly when operated. The system drainage for the flush assembly works either via recessed channel or is installed below the raised outdoor floor covering.

Product Name : AX 23B
Maximum Glass Thickness : 34mm
Maximum Height : 4500mm
Maximum Weight Capacity : 650kg.
