

# **Catena Office Landscape**<sup>™</sup>

Catena, which means 'chain' or 'connected series' in Italian, was inspired by the need for a connective system that supports the agile workplace of the future. This lightweight, versatile skeleton system delineates different zones for different activities. With its connective ability, Catena acts as a constant foundation, ready to be reconfigured after a week, a month, a year... or a decade.

#### Designers

Herman Miller R&D Team

#### Benefits

- Even more flexibility. It can be configured in myriad ways, and applied across the office for myriad tasks and to suit the full spectrum of user behaviour.
- Catena is unique in that it can shift from rectangular and grid formations to triangular and honeycomb settings – and with ease.
- Wire management system allowing for multiple distribution channels, both horizontally and vertically, with access points anywhere and everywhere they're needed.

**Warranty** 12-year, 3-shift
