

Sensor and Auto Shut taps

Sensor

JAL offers a wide range of sensor products for your washrooms. These intelligent water saving systems help in avoiding cross contaminations and are easy to use.

The sensor taps are available in both AC and DC mode. Auto flush function of once a day helps in keeping your washroom free from germs and odor.

Auto Shut Plus

Auto Shut Plus range is a product line that delivers preset quantity of water with a soft push. These water saving products consist of Pillar tap, Bib tap and Urinal stop cock, which are available with highly advanced magnetic cartridges ensuring consistent flow of water.

Sensor Fittings
A sensible way to experience water

- Hands free operation
- No cross contamination
- Suitable for Indian conditions
- Intelligent water saving system

78212B Sensor Tap for Basin 'Karna' 15 mm **MRP 7390/-**
