

# EVOLUTION

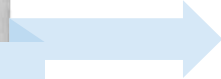

## Comfort height, updated ergonomics

Over the last 100 years, the average height of people in industrialized nations has increased approximately by 10 cm. To be innovative in design also means meeting the changes in population and their new needs in terms of ergonomics and comfort.

RAK Ceramics design evolves together with human evolution.

### NEW STANDARD HEIGHTS

CUSTOMISED HEIGHT  
(43 CM RECOMMENDED)

# HIDDEN FIXATION

## Hidden Fixation System

It's easy, it's safe.

Our wall hung products are benefitting of the collaboration with Fischer Group, one of the industry leaders. The use of the most innovative Fischer fixing systems, is allowing us design freedom on the ceramic, better aesthetics and more safety for the installer.

The Hidden Fixation System is comfortable and time saving, in fact one-man installation is made possible by the clip system that keeps the ceramic held up during the installation.

### SAFER INSTALLATION PROCEDURE

# RIMLESS

## The Ultimate Rimless Technology for your bathroom

RAK Ceramics delivers the ultimate in technology for bathroom suites. Based on similar design specifications to sanitaryware in hospitals and medical centres, RAK Ceramics Rimless water closets allows you to experience the same high standards of hygiene in your own home. RAK Ceramics continues to set new standards of hygiene and water efficiency in the sanitaryware industry, with uniquely engineered water flushing systems that effectively remove waste, helping to keep bathrooms fresh and hygienic.

### HYGIENIC AND EASY TO CLEAN

The water closets have no rims to harbour germs, making cleaning quick, easy and more hygienic.

### WATER SAVING

Using just 4 litres for the full flush and 2.5 litres for the half flush, water usage is reduced by a third.

### EFFICIENT DESIGN

Design and efficiency can be successfully combined. Water flows vertically and horizontally, before flushing the entire inner surface of the bowl, without splashing.

### SILENT FLUSH

Rimless technology allows a faster and more silent flush.

EASY TO CLEAN,  
WITH LOW WATER CONSUMPTION.

# Can we save water in our bathrooms?

One of the easiest ways to save water is to install a toilet with a 3 Liters single flush cistern.

RAK Ceramics has developed this innovative watersaving technology specifically for those countries with limited water resources, delivering a system that perfectly flushes with a reduced 3 Liters single flush.

By using a lower volume of water to flush the toilet you can dramatically reduce your annual water consumption.

LOW-FLUSH  
**50%** reduction

- 3l flush: reduce water usage by 50%
- Siphonic flush: efficient, fast and silent.
- Single Eco flush: perfectly flushes the WC no dual flush needed.
- Rough in distance: 305mm
