

RTF-Z2 Eltron®

TEMPERATURE CONTROLLER

PRODUCT-NO.: 231065

The underfloor temperature controller RTF-Z2 offer plenty of convenient features and easy control. It can be mounted individually above light switches, sockets etc. made by different manufacturers. The digital 7-day time switch can be programmed to individual requirements. The switching times can be adjusted; comfort, setback and frost temperature can be individually programmed. The self-learn function tells the electronics the exact start time so that the floor has reached the specified temperature at the required time. The heat-up time is constantly determined, and the start time regularly optimised. That raises the comfort level and reduces the energy consumption.

The main features

Large illuminated LCD display

Intuitive menu guidance

Self-explanatory programming

Party function for a single suppression of the temperature program

Automatic heat-up time calculation

Optional integration into underfloor heating system programs

Type	RTF-Z2 Eltron®
Part no.	231065
Width	81 mm
Height	85 mm
Depth	45 mm

Technical data

Rated voltage	230 V
Frequency	50/- Hz
Breaking capacity	10 A
Switching differential	1 K
Setting range	10-42 °C
Colour	pure white, RAL 9010
Type of installation	Unfinished walls
